Cowboy Mounted Shooting combines horsemanship and marksmanship. Riders use two single action .45 caliber revolvers loaded with blanks that will break a balloon up to about 15 feet, as they ride and navigate 1 of approximately 65 courses.

During a typical run a rider crosses the start/ finish line at full speed, shoots 5 balloons, holsters one pistol, draws the second, turns the run down barrel, shoots 5 more balloons and runs back across the start/finish line.
